SOLID SET IRRIGATION

A cost-effective semi fixed irrigation system

www.isia.company

1

ECONOMIC SOLUTIONS

ISIA Solid Set is a **cost-effective semi fixed irrigation** system.

An ideal method to **reduce labour** by eliminating the need for shifting, which **saves power**, uses **water efficiently** and not only **increases quality and production**, but also **minimizes nutrient losses**.

Suitable for paddocks of **any size, shape and terrain**, perfect for **pivot corners, crops and horticulture**. It can also be used for **effluent application** given its **high uniformity** and **low application rates**.
